SUMMARY

After various experiences in the past 2 years, I have emerged as a fresh web developer after earning a certificate in full-stack web development from Monash University. I have developed technical skills and languages that cover front-end and back-end development, which include JavaScript, Node JS, React JS, MongoDB and SQL. I am a keen learner and am looking to work with fellow developers to build impactful technologies. As a Master's graduate with a year of full-time experience in the IT industry, I have developed soft skills that include critical thinking, communication and teamwork. I aim to further understand people, relationships, interactions and the technological applications that can be used to enhance work-life satisfaction, efficiency and productivity through the combination of studying a Bachelor of Science (Psych), Masters of Business Information Technology and a Full Stack Web Development Diploma.

TECH STACK KNOWLEDGE

EXPERIENCE

Beau-Rie
